

# Polystyrene recyclable

The Green Industry in South Africa is growing at a tremendous rate and more people want to be part of the green revolution.

The Natural and Organic Products Exhibition provides the widest range of natural and organic products, services, information and practical advice for all your lifestyle, health and green business requirements.

The show is from 26 to 28 June at the Coca-Cola Dome in Johannesburg.

The Polystyrene Packaging Council of South Africa (PSPC) will host a stand at this year's exhibition and give visitors the facts on polystyrene.

Many consumers do not know that polystyrene is in fact a plastic and can be recycled. The council will assist consumers with getting their recycling efforts going and identify where to take their polystyrene for recycling.

Polystyrene is found in your office, home, local grocery store and favourite restaurant. It comes in many shapes and forms, from foam egg cartons to salad boxes, from coffee cups to CD jewel boxes and from produce trays to 'peanuts' used in packing and the lightweight foam pieces that cushion new appliances and electronics. PSPC needs all your polystyrene for our recycling efforts. Identify polystyrene with the number six inside a rectangle with clockwise arrows. In an effort to raise awareness of polystyrene as a product and its numerous packaging uses, the impact on the environment and the importance of recycling, the raw material suppliers and manufacturers of polystyrene products have joined forces to form the PSPC in South Africa.
